

ENTREPRENEURS AND EMERGING BUSINESSES

Henson Efron is dedicated to working with start-up clients – whether they have game-changing ideas, or are just starting a new chapter in their lives. Working with start-up companies and participating in their growth and success is among our most interesting and rewarding work.

We advise emerging businesses at every stage of formation and growth, from advice on the structure of a new entity to assistance with strategic transactions. When assisting emerging businesses, our focus is on using our past experience to provide efficient and practical advice to ensure that our clients make the best use of their limited resources. We have a reputation for being not just a vendor of legal services, but also integral and valued advisors to each client's business team.

In order to anticipate and meet our clients' needs, we invest the time needed to learn each client's business and industry. Our goal is to provide practical solutions to our clients' business and legal issues in a manner that allows them to focus their attention on growing their businesses.

GIVEN THESE GOALS, WE HAVE DEVELOPED THE FOLLOWING PROGRAMS SPECIFICALLY DESIGNED TO HELP OUR CLIENTS SUCCEED:

Our Start Up Business Plan offers new business clients a fixed number of hours of legal services at competitive billing rates during their first year of operations.

We also offer flexible and deferred payment arrangements to companies in the early stages of their development.

We offer small business billing arrangements with fixed monthly payments providing regular access to legal services on terms tailored to meet your business needs.

We offer fixed fee billing for the types of matters most commonly requested by small business owners.
